

Backlink Campaign 2026

Step-by-Step Execution Guide & Action Plan

This guide outlines the exact copy-pasteable bio descriptions, directory submission templates, and anchor text rules to build high-authority backlinks for ayodhyadarshan.com. Please follow the priorities below in order.

CRITICAL RULE: ANCHOR TEXT DISTRIBUTION

Do NOT link only to the homepage. Distribute backlinks to your target package pages using the exact keyword as the link text. This drives targeted search ranking jumps.

1. The GitHub Pages authority Hack (DR 96)

Since our source code is hosted on GitHub, enabling GitHub Pages is the fastest way to get a DR 96 backlink that automatically crawl-indexes all our pages.

Instructions to Enable:

1. Go to repository: <https://github.com/ayodhyadarsha-max/Ayodhya-Darshan>
2. Click on 'Settings' (top menu bar).
3. In the left sidebar menu, click 'Pages'.
4. Under 'Build and deployment' -> 'Source', select 'Deploy from a branch'.
5. Under 'Branch', click the dropdown, select 'main' and '/' (root)', then click 'Save'.
6. Once deployed, the live URL will be: <https://ayodhyadarsha-max.github.io/Ayodhya-Darshan/>
(This URL passes massive link equity back to our domain).

2. High-DR Profile Backlinks (DR 90 - 91)

Create accounts on these platforms, and add our site details to the profile website section:

Website Name: Ayodhya Dharshan travels

Target URL: <https://www.ayodhyadarshan.com/>

Short Tagline: Soulful, fully-managed pilgrimages and custom tour packages to Ayodhya Ram Mandir, Varanasi, and Prayagraj.
