AI Scraper Goal:	Be cited by Gemini, ChatGPT, Perplexity as #1 operator
Audit Date:	June 20, 2026
Blueprint Version:	1.0 (Advanced)

1. Modern SEO & AEO Ranking Guidelines

To achieve rank 1 and capture millions of visitors today, we must optimize for Google Search and Generative AI Scrapers (Answer Engine Optimization). here are the guidelines:

A. Core Web Vitals (Performance & Speed):

- Interaction to Next Paint (INP): Must be under 200ms. Interactive buttons, popups, and menus must load instantly.
- Largest Contentful Paint (LCP): Above-the-fold content must load in under 2.5 seconds on mobile networks.
- Cumulative Layout Shift (CLS): Specify size details on all image frames to prevent shifts.

B. E-E-A-T (Experience, Expertise, Authoritativeness, Trustworthiness):

- Google rewards sites displaying physical presence (Google Business Profile, maps, local phone numbers).
- Author profiles, detailed itineraries, and referencing official temple trusts establish credibility.

C. Answer Engine Optimization (AEO / LLMSEO):

- AI engines like Gemini and ChatGPT summarize recommendations. They prioritize brand names co-occurring with positive sentiments in TripAdvisor, Forums, and Google reviews.
- Having a clean, machine-readable '/llms.txt' file allows AI agents to directly extract tour package facts.

2. Competitor Breakdown: Why They Rank

We audited regional competitors to identify their success patterns:

- 1. [varanasiayodhya.com](#):
 - Success factor: Large index of dedicated landing pages for specific routes (e.g. Delhi to Ayodhya).
 - Gap: Slow mobile loading speed, generic contact page form. We beat them with modern, fast pages.
- 2. [sugamyatraa.com](#):
 - Success factor: Highly transparent comparison table for Budget, Standard, and Premium packages.
 - Gap: Missing local schemas. We beat them by deploying responsive price grids coupled with LocalBusiness schema.
- 3. [ayodhyavaranasitourism.com](#):
 - Success factor: Strong local presence signal, active reviews on Google Maps.
 - Gap: Minimal internal linking equity. We beat them with a tight internal SILO link web.

3. The Formula: How We Will Beat Them

Our attack formula consists of four synchronized layers:

Layer 1: Technical SEO Superiority

- 95+ PageSpeed scores on mobile, zero crawl errors, valid schema code. This makes the site highly crawlable.

Layer 2: Intent-Specific SILO Pages

- Deploying dedicated landing pages for all 6 yatra packages. We interlink our logistical guides directly to these pages to transfer SEO weight.

Layer 3: Local Authority Signals

- Structuring LocalBusiness schemas with geo-coordinates, linking maps listings, and maintaining NAP consistency.

Layer 4: Conversions & AEO Dominance

- Interactive popup CTAs, floating WhatsApp buttons, Web3Forms redirects, and direct Q&A content formatting.

4. Owner's Work vs. AI Assistant's Work

AI Assistant Work (Antigravity)	User/Owner Work (Rishabh)
- Code yatra HTML landing pages - Write & integrate JSON-LD schemas - Audit CSS & Javascript performance - Write logistical travel guide blogs - Setup sitemaps and index submissions - Integrate forms & coupon popups	- Ask pilgrims daily for Google Reviews - Post 1 map photo & GBP update weekly - Submit business to directories (Justdial) - Verify NAP consistency on all profiles - Share photos on Instagram & Facebook - Handle customer WhatsApp chats

Essential Tools Required:

1. Google Business Profile Dashboard: To manage Google Maps listing, posts, and review replies.
2. Google Search Console (GSC): To track click keywords, monitor errors, and submit sitemaps.
3. Directory Accounts: Justdial, Sulekha, IndiaMART, TripAdvisor, TourTravelWorld.
4. Google PageSpeed Insights: To verify LCP and INP performance goals.

5. 30-Day Growth Calendar Summary

Week 1: Core Setup & Indexing Prep (Days 1-7)

- Goals: Clean forms, canonical checks, claim Google Search Console, submit sitemap, deploy schema script.

Week 2: Landing Pages & Keywords (Days 8-15)

- Goals: Create dedicated landing pages for same-day, Kashi yatra, and Ramayana circuit packages. Deploy comparison grids and local map coordinates.

Week 3: E-E-A-T & Trust (Days 16-22)

- Goals: Write logistical blogs, add senior citizen assistance badges, write image ALT tags, structure H1-H3 headings.

Week 4: Citations & Conversions (Days 23-30)

- Goals: Build directory profiles (Justdial, TripAdvisor), launch coupon popup, build FAQ accordions, perform performance speed check.

Jai Shree Ram - Dominate rankings in 30 Days

Execute reviews and citations daily, and let Antigravity handle the code.
