

AYODHYA DHARSHAN

TEERTH YATRA SEVA

30-DAY GO-TO-MARKET SEO & AEO PLAN

A Comprehensive Guide to Ranking #1 & Dominating AI Engines (Gemini, ChatGPT)

Project Parameters & Roles:

Target Site:	https://www.ayodhyadharshan.com/
Booking Portal:	https://book.ayodhyadharshan.com/
Target Focus:	Commercial Yatra Enquiries (Ayodhya, Varanasi, Prayagraj, Chitrakoot, Mathura)
AI Assistant Role:	Technical SEO, On-page Optimization, Code Adjustments, JSON-LD, Blog Copywriting
User/Owner Role:	Google Business Profile, Local Citations, Review Acquisition, Backlinks Outreach
AEO / LLMSEO Goal:	Ensure citations and suggestions in ChatGPT, Gemini, Perplexity, and Copilot
Launch Date:	June 20, 2026
Status:	Approved & Active

1. Introduction & Strategy Philosophy

This 30-Day Growth Plan is designed specifically for Ayodhya Dharshan to capture high-intent commercial travel traffic. Unlike standard passive SEO, this strategy targets both search engines (Google Search) and Answer Engines (ChatGPT, Gemini, Perplexity, etc.) to capture pilgrims at the exact moment they decide to plan a yatra.

The plan operates on a Split Execution Model: your AI Assistant handles all on-page code implementation, schemas, sitemaps, and content generation, while you (the business owner) focus on real-world factors that search engines use to judge trust, such as local reviews, citations, and authority backlinks.

Role & Execution Split:

AI Assistant Responsibilities (On-Page)	User / Owner Responsibilities (Off-Page)
- On-page keyword mapping & header tag optimizations. - Writing & auditing advanced JSON-LD structured schemas. - Coding responsive landing pages & price tiers grids. - Writing high-quality, SEO-optimized blog copy. - Sitemap and robots.txt technical configurations. - CRO popup modals & conversion rate optimization.	- Acquiring daily positive reviews on Google Maps (GBP). - Creating citations in local Indian business directories. - Initiating backlink outreach to partner travel portals. - Publishing photos and posts on Google Business Profile. - Creating social media profiles for brand signals. - Handling Web3Forms and WhatsApp lead conversions.

2. The 30-Day Growth Calendar

Follow this daily schedule strictly to achieve rapid ranking gains and maximum traffic conversion.

Day 1 : Technical audit & canonical checks

Your Action: Review Web3Forms integration, thank you redirections, and WhatsApp click-to-chat triggers across all pages.

Day 2 : Advanced JSON-LD deployment

Your Action: Generate yatra product schema and FAQPage JSON-LD schemas for newly deployed pages.

Day 3 : Clean redirect & broken link audit

Your Action: Check for 404 errors, fix old path links, and audit external links.

Day 4 : Funnel Tracking setup

Your Action: Setup click event listeners on WhatsApp floating buttons and submission clicks.

Day 5 : Google Search Console optimization

Your Action: Claim domain property (<https://www.ayodhyadharshan.com/>) in GSC.

Day 6 : Robots.txt & Canonical audit

Your Action: Verify robots.txt has the correct sitemap pointer and clean canonical declarations.

Day 7 : Phase 1 Live Check & Verification

Your Action: Perform full live testing of all mobile links, forms, and desktop layouts.

Day 8 : Target Keyword mapping

Your Action: Share high-intent local search keywords (e.g. "Ayodhya tour cost", "Kashi tour package").

AI Ac

Day 9 : Dedicated Same Day Page creation

Your Action: Review same day tour copy and suggest local landmarks to include.

AI Ac

Day 10 : Ramayana Circuit global rename

Your Action: Verify all printed materials and brochures reference the "Ramayana Circuit" brand name.

AI Ac

Day 11 : SILO internal linking setup

Your Action: Link to the new package pages from related local guides and blog posts.

AI Ac

Day 12 : Comparison Grid integration

Your Action: Select pricing tier amounts (Budget, Standard, Premium) for all 6 yatra packages.

AI Ac

Day 13 : Local SEO optimization

Your Action: Ensure Google Business Profile (GBP) name matches "Ayodhya Dharshan".

AI Ac

Day 14 : Mobile responsiveness testing

Your Action: Test page rendering on various mobile screen sizes and touch targets.

AI Ac

Day 15 : Sitemap verification

Your Action: Submit sitemap.xml update in Search Console.

AI Ac

Day 16 : Testimonial schema integration

Your Action: Collect real reviews and ratings from happy pilgrims.

AI Ac

Day 17 : Logistical Guide writing

Your Action: Provide list of local trains/flights to Ayodhya.

AI Ac

Day 18 : Senior Citizen Support Page

Your Action: Share details of wheelchair services and senior hotel partnerships.

AI Ac

Day 19 : Outbound Authority backlinks

Your Action: Establish content partnerships with local travel bloggers.

AI Ac

Day 20 : Heading Hierarchy optimization

Your Action: Ensure only one H1 tag is present on each page.

AI Ac

Day 21 : Anchor Text adjustments

Your Action: Verify anchor text matches exact page targets instead of "click here".

AI Ac

Day 22 : Image Alt Text audit

Your Action: Rename images to use descriptive filenames (e.g. ram-mandir-darshan.jpg).

AI Ac

Day 23 : GBP Sync

Your Action: Post daily photos of Ram Mandir and Kashi Vishwanath on GBP.

AI Ac

Day 24 : Local citations building

Your Action: Register business in Indian directories (Justdial, Sulekha, IndiaMART).

AI Ac

Day 25 : Popup CTA A/B testing

Your Action: Set discount amount (e.g. Rs. 1001 Off) for festive seasons.

AI Ac

Day 26 : FAQ Accordions deployment

Your Action: Draft top 5 questions asked by pilgrims during bookings.

AI Ac

Day 27 : Full site technical audit

Your Action: Check for crawl logs errors or search indexing warnings.

AI Ac

Day 28 : Mobile conversion audit

Your Action: Try submitting forms and starting chats from a slow 3G connection.

AI Ac

Day 29 : Final sitemap submission

Your Action: Review sitemap.xml for completeness.

AI Ac

Day 30 : Analytics review & report

Your Action: Analyze monthly search traffic, WhatsApp clicks, and contact forms queries.

AI Ac

3. Answer Engine Optimization (AEO / LLMSEO)

Modern search habits are shifting. Devotees are increasingly asking AI tools like ChatGPT, Gemini, and Perplexity to design their yatra packages. To ensure Ayodhya Dharshan is suggested as the top recommendation, we implement a multi-layered LLMSEO strategy:

- 1. Brand Mentions on High-Authority Platforms:
 - AI models train on open platforms like Wikipedia, Wikimedia, TripAdvisor, and Reddit.
 - Action: Register and contribute yatra advice on forums and travel communities, referencing Ayodhya Dharshan.
- 2. Exact Match Q&A Formatting (llms.txt):
 - We maintain a dedicated llms.txt file in the root directory. AI scrapers read this file directly to learn about the business services, pricing, and contact details.
 - Action: Keep llms.txt continuously updated with new tour packages and contact details.
- 3. Contextual On-Page Copy:
 - AI models understand relationships. By linking cities (Ayodhya -> Prayagraj -> Varanasi) in structured paragraphs describing routes and histories, we position the site as the main authority on the Ramayana Circuit.
 - Action: Regularly write descriptive local travel guide posts answering specific pilgrim queries.

CRITICAL LOCAL OFF-PAGE TASKS:

1. Get 1 review per day on Google Maps. 2. Post 2 photos weekly on your Google Business Profile.
